

Diagnosis and Review Requirements

The Settlement Agreement controls what medical criteria applies when making a Qualifying Diagnosis, who reviews that diagnosis to see if it qualifies for a Monetary Award – the Appeals Advisory Panel of neurologists or the Claims Administrator – and how the review is to be done. This table shows how this works. Click the [Blue](#), underlined phrases for an explanation or more details about the terms used in this table. You can find more information about all this in the [Frequently Asked Questions](#). A printable version of this table and the defined terms is available [here](#).
