

Unauthorized Physician Networks

The BAP Administrator will establish and maintain a network of Qualified BAP Providers to provide baseline assessment examinations to Retired NFL Football Players. The Claims Administrator will do the same for the network of Qualified MAF Physicians who will be authorized to render Qualifying Diagnoses to Retired NFL Football Players under the terms of the Settlement Agreement. Additional information about both of these official networks will be posted on this website within 90 days after the Effective Date of the Settlement Agreement.

These are the only two medical provider networks with any official connection to or role in the implementation of the Settlement Agreement. Although the Settlement Agreement allows Retired NFL Football Players to receive Qualifying Diagnoses made by physicians with specified qualifications before the Settlement becomes effective, no networks or medical providers have received pre-approval of the Administrators or the Parties to the Settlement Agreement. If you are contacted by anyone claiming otherwise, please be aware that they are not acting as representatives of the Settlement Program.
