IN RE: NATIONAL FOOTBALL LEAGUE PLAYERS' CONCUSSION INJURY LITIGATION

April 6, 2022

We write with further information about our administration of the Court's Order of March 4, 2022, regarding the implementation of the Norming Agreement.

The Claims Administrator, working with the medical advisors to the Settlement Agreement, is finalizing its review of thousands of evaluations and claim files and has begun informing Players of the decisions in individual cases.

We believe that these decisions should be communicated to Players on a rolling basis rather than waiting for the review of all evaluations and claim files to be completed, which will take several more weeks. Accordingly, the Administrator is preparing notices that involve the same result for that group of Players (for example, decisions in which the carefully performed reviews do not show a change in outcome will be communicated at the same time), and has started sending them out.

Your notice of decision will come as follows:

- if you are represented by counsel, the notice of decision in your case will go to your attorney's portal account.
- If you are not represented by counsel and have a portal account yourself, the notice of decision in your case will be posted there and you will receive notice of that posting via email.
- If you are not represented by counsel and receive your information via US Postal Service, you should keep your eye on your mail for your notice.

We appreciate your patience as well as the great effort of the doctors, administrators, and others who are carrying out this important Court Order.
