

Details of Enhancements

We made changes to the official website of the Settlement Program on 3/12/25. As part of our ongoing efforts to make the site easier to use, we removed obsolete materials and updated FAQs. Here is a summary of the changes:

1. Useful Information – Reference Guides:

- (a) Removed the following reference guides:
 - (1) Diagnosis and Review Table;
 - (2) Guide to What Medical Records “Reflect” a Qualifying Diagnosis; and
 - (3) Guide to Raw Scores.
- (b) Updated the Guide to Liens in the Settlement Program to reflect the current common benefit fee deduction amount.

2. MAF Physician Locator Tool:

- (a) We removed the following language that populates when you search for a physician: *“Some of these Qualified MAF Physicians are identified as “*Pending.” This means the physician has been approved as a Qualified MAF Physician, but there are still some steps required to complete the paperwork.”* We no longer post physicians on the list until they have completed all necessary steps and are ready to start evaluating Retired Players.
- (b) We also recently confirmed contact information for all Qualified MAF Physicians to ensure the posted information is up-to-date and that all posted doctors are active in the Program.

3. Governing Documents – Governing Rules: We removed the Amended Rules Governing Petitions for Deviation from the Fee Cap because these deviations are now handled through the Attorneys’ Lien resolution process.

4. FAQs:

- (a) We updated the following FAQs to correct/update information that is no longer accurate:
 - (1) Who are the Special Masters;
 - (2) Date of Qualifying Diagnosis for Death with CTE claims;
 - (3) The Attorneys’ Liens process; and

- (4) Reduction of the 5% Common Benefit Fund holdback.
- (b) We removed all FAQs regarding petitions for deviations from the Fee Cap, as those are now handled through the Attorneys' Lien resolution process.
- (c) We updated the FAQs to remove any references to the Reference Guides we removed as described in 1(a) above.
